

Sathya S

Python Full Stack Developer

Bengaluru, Karnataka | +91 8073787491 | sathysaravana2004@gmail.com
[GitHub](#) | [LinkedIn](#)

Professional Summary

Computer Science Engineering graduate specializing in Data Science with hands-on experience in Python, Django, React.js, SQL, and full-stack web development. Developed scalable web applications and database-driven solutions through internships and academic projects. Passionate about building reliable software, writing clean and maintainable code, and continuously learning modern technologies.

Technical Skills

Programming Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, React.js

Backend: Django

Database: MySQL

Developer Tools: Git, GitHub, VS Code

Core Concepts: Object-Oriented Programming, REST APIs, CRUD Operations, Responsive Web Design

Education

Bachelor of Engineering in Computer Science Engineering (Data Science)	2022 – 2026
<i>Impact College of Engineering and Applied Sciences (VTU)</i>	<i>CGPA: 9.01/10</i>
Government PU College, Yelahanka	2020 – 2022
<i>PCMB</i>	<i>74%</i>
Zeena English School	2019 – 2020
<i>SSLC</i>	<i>82%</i>

Internship

Python Full Stack Developer Intern	Feb 2026 – May 2026
<i>Dhee Coding Lab</i>	

- Developed Python applications using object-oriented programming principles, modular programming, and efficient debugging techniques.
- Designed and implemented a Student Attendance Management System using MySQL with complete CRUD functionality for efficient record management.
- Built responsive frontend applications using React.js, HTML5, CSS3, and JavaScript following component-based architecture.
- Gained practical exposure to Django backend development, SQL, REST API concepts, and modern full-stack application development.
- Strengthened problem-solving, database design, and software development skills through real-world projects and collaborative learning.

Projects

SheWorks – Empowering Women Through Online Services – MERN Stack Platform

- Developed a full-stack MERN application that empowers women entrepreneurs by providing an online platform to showcase services and connect with customers.
- Implemented role-based authentication, provider and client dashboards, booking management, order tracking, reviews, and payment workflow modules.
- Built responsive user interfaces using React.js and integrated backend functionality with Node.js, Express.js, and MongoDB.
- Designed scalable database collections and optimized application workflow for improved user experience.

General Health Prediction – Machine Learning

- Built a machine learning model to predict general health status by preprocessing data, performing EDA, and training classification algorithms
- Trained and evaluated Logistic Regression, Random Forest, and SVM models, and evaluated their performance using standard classification metrics.

Certifications

- **Python Full Stack with Generative AI** – Dhee Coding Lab
- **Artificial Intelligence** – Elewayte
- **Data Analytics (Power BI & Tableau)** – Great Learning

Leadership & Activities

- Volunteered at a Mega Job Fair, supporting recruitment coordination, candidate management, and event execution while collaborating with organizing teams.
- Participated in a community Walkathon promoting social awareness, teamwork, and active community engagement.
